proudly made in the USA

**YOUNG™**

Thank YOU for your interest in Vera by Young. For over 100 years, Young Dental has been dedicated and committed to creating solutions for the dental hygienist.

It was this drive that brought us to design and manufacture Vera by Young right here in the USA – to focus on things that matter to YOU. We understand the importance of **Visibility, Ergonomics, Reach and Access** with the amount of patients you see on a daily basis, so we thought a lot about incorporating these features while developing Vera by Young, and we're happy to report we made improvements across the board! As pictured below, Vera by Young is available with our popular Elite Original™ prophylaxis cup, featuring outer ridges for reduced splatter and improved stain removal.

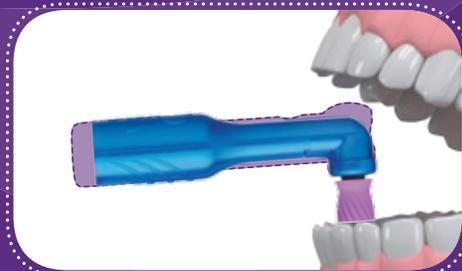

slim neck diameter for **IMPROVED VISIBILITY**

enhanced **GRIP** features

rounded head for **IMPROVED** maneuverability

**ERGONOMIC** design for improved Patient & Clinician **COMFORT**

EASILY ACCESS **hard-to-reach AREAS**

**25% Slimmer Neck Design\***

**58% Greater Clearance with Rounded Head Design\***

**Sleek Design with Reduced Surface Area\***

# Seeing is Believing.

and Vera by Young has Believers!

“The Vera by Young prophylaxis angle packs a lot of power into a little prophylaxis angle! It is the best prophylaxis angle out there for any mouth. I have used hundreds of prophylaxis angles and **this one truly is the best.** Its compact size really helps to polish pediatric patients as well as **reach the distal buccals of the maxillary second molars with ease!**”

-Karen Reiner, RDH

“I didn't realize how much I couldn't see with the other prophylaxis angles until I used Vera by Young. It was much **easier to access** facial surface of maxillary molars.”

-Ellen Wentz, RDH

“Vera by Young offers a streamlined, prettier design, accesses difficult to reach areas, and **provides the feeling of increased visibility,** with slightly less vibration.”

-Donna Grzegorek, RDH

\*When compared to Young Classic Disposable Prophylaxis Angle.
